Industrial Corridor Land Platform

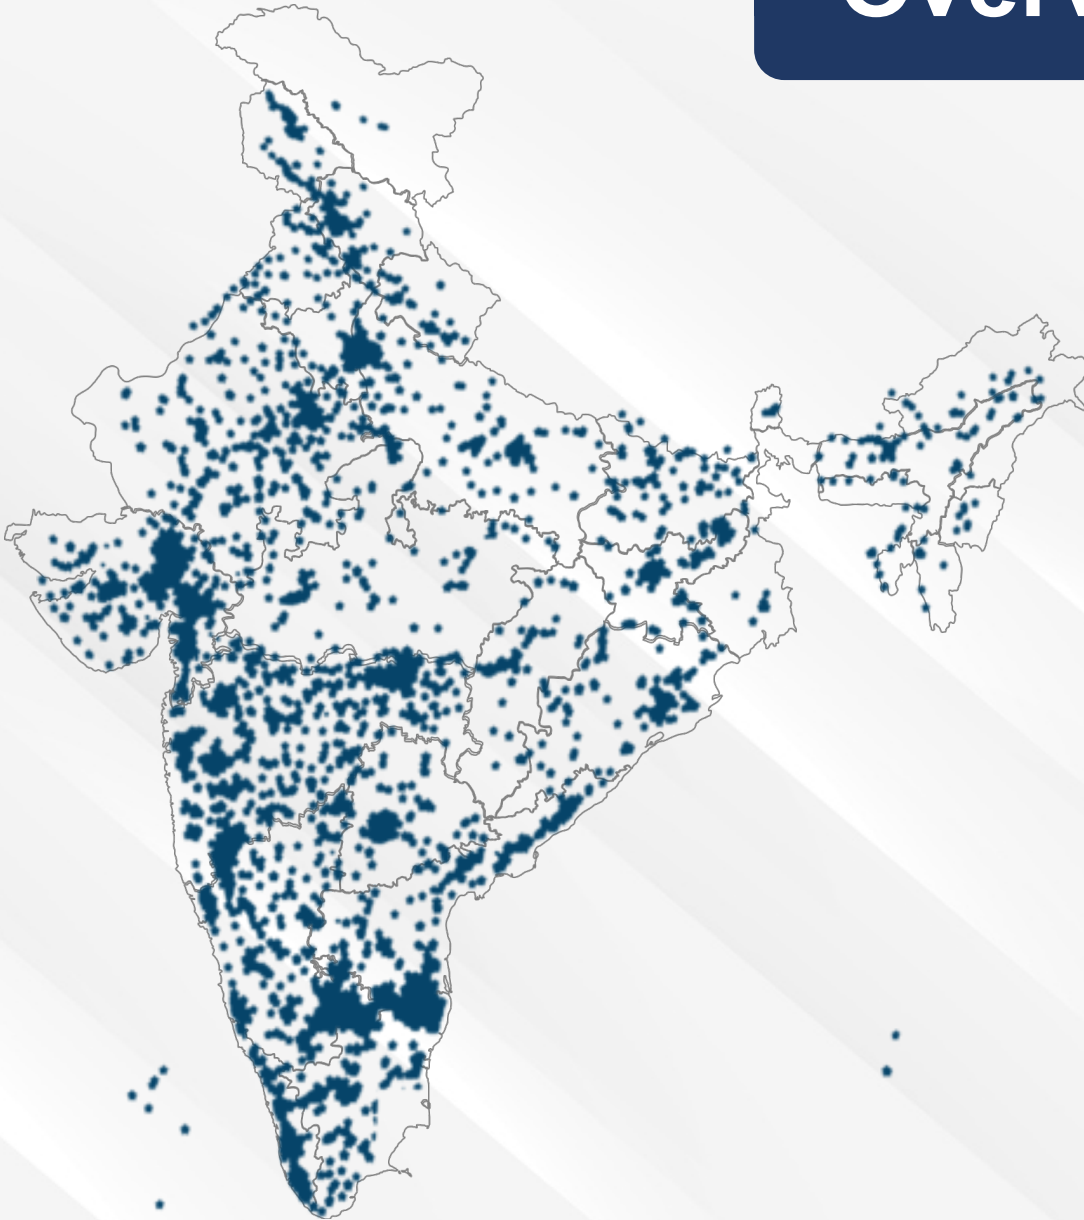

an initiative of

National Industrial Corridor Development Corporation

under the administrative control of

**Department for Promotion of Industry and Internal Trade
Ministry of Commerce and Industry
Government of India**

Overview of ICLP

Industrial Corridor Land Platform (ICLP) is a national repository of verified industrial land and infrastructure data. It helps investors explore industrial parks, check land availability and make informed location decisions across India.

4,000+
Industrial Parks

~5.4 Lakh
Hectares
Total Land

80,000+
Total Plots

1 Lakh + Hectares

Policy & Incentive
Information

Key Features of Industrial Corridor Land Platform

Sector opportunities

Explore sector-specific investment options

ICLP AI agent

Answers on parks, sectors, policy and infrastructure

Utilities & Amenities

Discover utilities and social infrastructure available within industrial parks.

GIS Infrastructure Layers

Access connectivity, logistics, and social infrastructure through interactive GIS layers.

Explore Nearby Ecosystem

Analyse the industrial ecosystem within your selected radius

Compare locations

Download park details and comparison reports in PDF

Investor Tools for Land and Approval Planning

Cost Calculator

Estimate land and project setup costs

Investor's Site Visit Kit

Checklist for effective industrial site visits

Land Allotment Workflow

Step-by-step industrial land allotment guidance

Know Your Approvals

State-wise industrial approvals and clearances

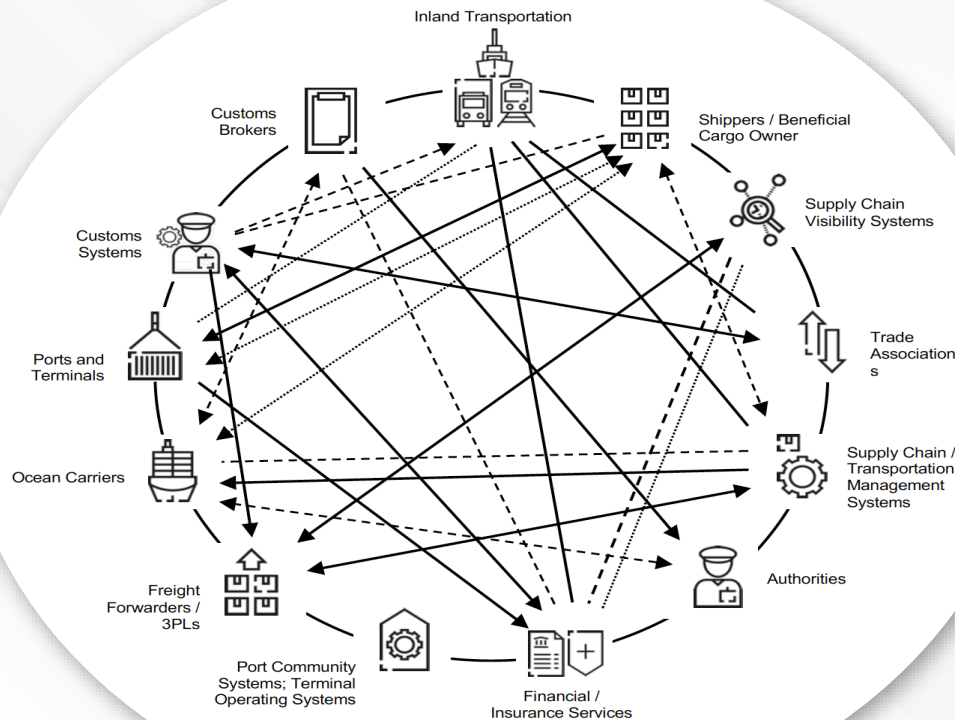

NICDC Logistics Data Services Limited

Logistics e- Marketplace

India's logistics service ecosystem is highly fragmented, compelling logistics stakeholders to engage with multiple unintegrated platforms

SILOED MARKETPLACES

CHALLENGES

Lack of Price Discovery

Inconsistent Bookings

Higher Transaction Costs

Regulatory Non-Compliance

Shipment Delays

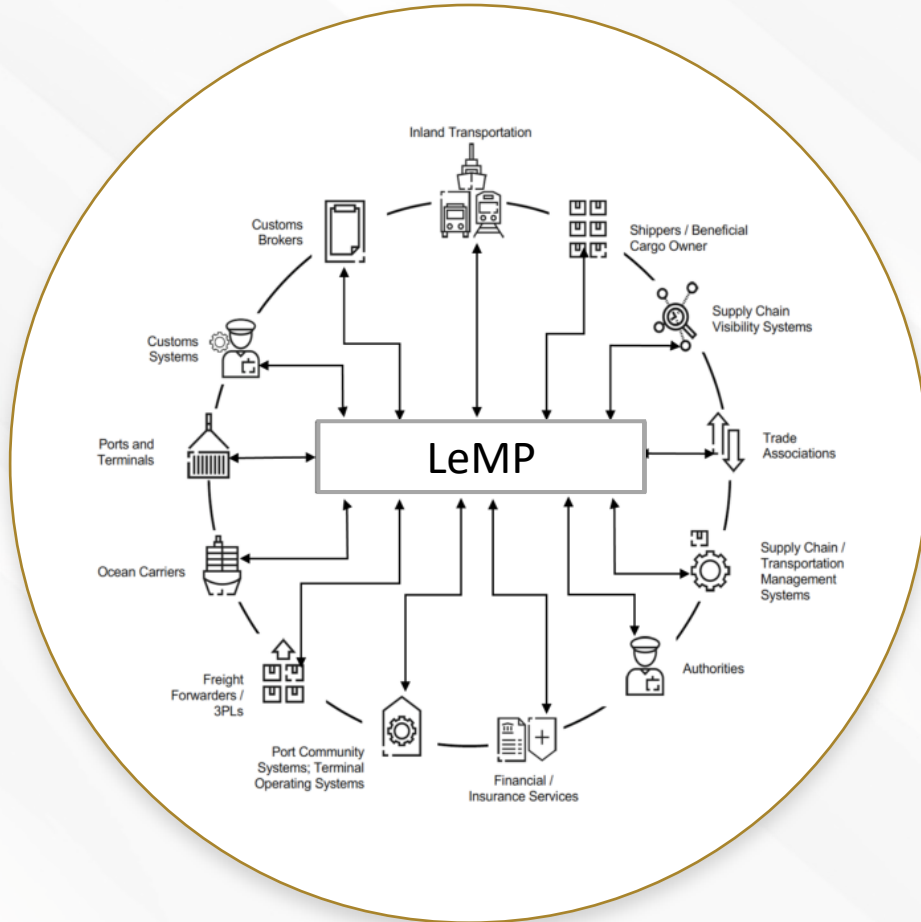

Delay in Payment

Documentation Errors

Logistics e- Marketplace

Objectives:

Digital stack for logistics sector

Create single digital platform

Lower transaction costs

Reduce duplication in documents

Develop operational efficiency

Improve data visibility and traceability for Stakeholders

Support EXIM related government initiatives for logistics sector

Logistics e- Marketplace

LeMP is a **unified single-window digital platform**, powered by **ULIP**, that serves as a **gateway for integrating multiple platforms and e-marketplaces** to deliver **end-to-end logistics services**.

Discover

Search & compare verified logistics service providers, warehouses, rates, schedules & capabilities

Certification

Redirection to the relevant certification website

EXIM Rules Engine

Access commodity & country specific EXIM compliance & documentation requirement

Document Exchange

Generate, store & securely exchange trade & logistics documents

Track & Trace

Track & trace shipments in real time across all modes

Banking & Insurance

Access trade finance & marine cargo insurance services

Key Benefits

Single Window Platform

One digital window for discovery, planning, certification & compliance

End-to-End Logistics

Seamless execution across the full journey, origin to destination

Multimodal Coverage

Road, Rail, Sea & Air — across EXIM and domestic trade

Ease of Doing Business

Greater transparency, lower cost & time, improved ease of doing business
